Tillers  
Tie bar  
Emergency tiller  
Inspection hatch

## **Commissioning and delivery**

Delivery to UK  
Commissioning at Emsworth, nr Portsmouth  
1 day familiarisation sea trial and handover

## **Construction**

All Multimarine catamarans are rated to the highest appropriate level of the European Recreational Craft Directive Design and Build Quality Assurance.

Hull and deck mouldings are hand laid glass fibre, using powder-bound mat, multiaxial e-glass fabrics, and isothalic resin throughout. Crestoma core bond is used for all cores; all cores are vacuum bagged. Below the waterline the hulls are solid laminate, while the topsides and deck incorporate PVC foam and end grain balsa core. The deck has an integrally moulded non-slip finish. The hull and deck join is fully bonded. Many of the structural bulkheads are of vacuum bagged foam core, and when the interior furniture is fully bonded, it forms a light and stiff monocoque structure.

The Multimarine DISCOVERY is virtually unsinkable due to its watertight bulkheads and buoyancy compartments fore and aft. The keels are integrally moulded and sealed off from the hulls forming a double bottom.

The above specifications are given in good faith but are not guaranteed as Multimarine Composites reserve the right to amend and alter specifications at any time without prior notice.

**Special Boat Show price - £94,680**

*Please contact Multihull World for prices of listed options.*
